

Lab Assignment-2

2. Programming Excerices on Linear Regression and Data Normalization

2.1 Write a program to develop a Simple Linear Regression Model on the given data set.

x	y
1	2
2	4
3	5
4	4
5	5

2.2 Write a program to develop a Multiple Linear Regression Model on the given data set.

x1	x2	y
1	1	5
2	1	7
1	2	8
2	2	9

2.3 Write a program to apply the following Data Normalization Methods on the given single input feature.

$x = [10, 20, 30, 40, 50]$

- Standardization
- Min-Max Normalization
- Mean Normalization

2.4 Write a program to apply the following Data Normalization Methods on the given multiple input features.

Height	Weight	Age
150	50	25
160	60	30
170	65	35
180	80	40

- Standardization
- Min-Max Normalization
- Mean Normalization
